# Overview

The project involves creating a web-based solution to provide an integrated environment for university students to find alumni and make contact with them possible. The site will allow graduate and undergraduate student to communicate with each other and provide their alumni's public information, their previous researches and referring job facilities through them.

## Justification

Currently, there are many major universities in Bangladesh and every year a massive number of students are graduating from there. But it becomes difficult for the undergraduate students to contact with their seniors or alumni as there are no particular section for this. A systemic and organized environment can be built to make this possible.

## Goals

1. Create an application where undergraduate students and respective university alumni can share their details and can give job or research opportunity to others.
2. Make an easy interface to communicate with each other.

## Specifications

1. A registration process will allow them to create their profile.
2. Profile details can be uploaded by user about their educational qualifications
3. Their journals will be kept in their respective profile
4. If any alumni offer any courses, jobs or researches, it will be also available there
5. A messaging system will be there for communication

## Project Duration

12 weeks.

## Project Start Date

Date here will be the date that the advance payment is cleared.

## Phases with cost

Phases	Description	Duration	Cost
Phase 1	In this phase, the registration and log in module will be completed. Users can create their account.	4 weeks	35,000
Phase 2	In this phase, they can make their profile with details, uploading journals.	5 weeks	40,000
Phase 3	This phase will involve message communication.	3 weeks	35,000
	Total	12 weeks	110,000

## Payment Plan

1. An advance payment of BDT 10,000 will be required to start the project.
2. The rest of the money must be paid based on phases. Complete payment due for each phase must be paid within 10 days of the completion of the phase.

## Terms and Conditions

1. The Advance payment becomes non-refundable after two weeks of the project initiation.
2. After the final delivery of the product (completion of all phases), the client will have a window of one (1) month to report any issues that may have been caused by the application programming. These issues will be fixed for free.
3. After the end of one month of free support period after final product delivery, any and all works requested by client will incur charges on the client based on negotiated pricing.

## Agreement
